COMPUTERS & GEOSCIENCES

An International Journal devoted to the rapid publication of computer programs in widely used languages and their applications

Editor-in-Chief

D. F. Merriam, Kansas Geological Survey, The University of Kansas, Lawrence, KS 66047-3726, USA.
e-mail: dan_merriam@msmail.kgs.ukans.edu *Fax:* 913 864 5317 *Tel.:* 913 864 3965

Managing Editor

L. Brane, Stratigraphic Studies Group, Box 153, Wichita State University, Wichita, KS 67260-0153, USA

Associate Editors

F. P. Agterberg, Geological Survey of Canada, 601 Booth Street, Ottawa, Ontario, Canada K1A 0E8
G. F. Bonham-Carter, Geological Survey of Canada, 601 Booth Street, Ottawa, Ontario, Canada K1A 0E8
J. M. Cubitt, Geochem Group, Chester Street, Saltney, Chester CH4 8RD, UK
D. M. Hawkins, Department of Applied Statistics, University of Minnesota, St Paul, MN 55108, USA
R. J. Howarth, Department of Geological Sciences, University College London, Gower Street, London WC1E 6BT, UK
R. W. LeMaitre, "Lochiel", Ross 7209, Tasmania, Australia
D. C. Peters, U.S. Bureau of Mines, PO Box 25086, Building 20, Denver, CO 80225, USA

Book Review Editor

E. Grunsky, BC Geological Survey, 553 Superior Street, Victoria, BC, Canada V8V 1X4

Software Review Editor

J. C. Butler, Department of Geosciences, University of Houston, Houston, TX 77004, USA

Assistant Editors

J. C. Brower (USA)
R. G. Craig (USA)
M. L. Crawford (USA)
G. deMarsily (France)
J. Doveton (USA)
A. G. Fabbri (The Netherlands)
P. F. Fisher (UK)
A. Förster (Germany)
F. Gradstein (Norway)
J. K. Hall (Israel)
J. T. Hanley (USA)
J. W. Harbaugh (USA)
U. C. Herzfeld (USA)
D. G. Jewett (USA)
A. Khan (UK)
E. Kirova (USA)
R. W. Knapp (USA)
R. Pflug (Germany)
J. E. Robinson (USA)
W. Schwarzacher (UK)
B. R. Shaw (USA)
M. A. Sophocleous (USA)
P. G. Sutterlin (USA)
H. Teil (France)
J. C. Tipper (Germany)
D. Unwin (UK)
G. V. Wolf (USA)
R. T. Williams (USA)

Editorial Correspondents

L. Carbognin (Italy)
H. A. F. Chaves (Brasil)
I. Djafarov (Azerbaidzhan)
G. Gaal (Hungary)
D. Gill (Israel)
J. Harff (Germany)
Liu Chengzuo (China)
P. Macquire (UK)
N. Nishiwaki-Nakajima (Japan)
M. Pena Daza (Bolivia)
R. A. Reyment (Sweden)
W. Scherer (Venezuela)
J. H. Schuenemeyer (USA)
H. Wackernagel (France)
V. T. Vuchev (Bulgaria)
Zhao Pengda (China)
P. J. Yarka (USA)

Officers and Council of the IAMG (1992–1996)

President: M. E. Hohn (USA)
Past President: R. B. McCammon (USA)
Vice President: C.-J. F. Chung (Canada)
Secretary General: R. A. Olea (USA)
Treasurers: J. O. Kork (USA)
V. Nemec (CR)

Council Members

M. Alfaro (Chile)
D. Zhou (China)
E. Grunsky (Canada)
V. Pawlowsky (Spain)
J. C. Tipper (Germany)
G. Verly (UK)
P. D. Zhao (China)
Editor of *Journal of Mathematical Geology*: R. Ehrlich (USA)
Editor-in-Chief of *Computers & Geosciences*: D. F. Merriam (USA)
Editor of *Nonrenewable Resources*: R. B. McCammon (USA)
Editor of *Newsletter:* J. R. Carr (USA)

Publishing Office: Pergamon Press Ltd, Pergamon House, Bampfylde Street, Exeter EX1 2AH, England [*Tel.* Exeter (0392) 51558; *Fax* (0392) 425370]. **Production Editor:** John Bailey.

Subscription and Advertising Offices: *North America:* Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, USA; *Rest of the World:* Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, UK [*Tel.* Oxford (0865) 794141].

Subscription Rates: Annual Institutional Subscription Rates 1994: North, Central and South America, US$930.00, Rest of the World £605.00. Associated Personal Subscription Rates are available on request for those whose institutions are library subscribers. Sterling prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice.

Back Issues: Back issues of all previously published volumes, in both hard copy and in microform are available direct from Pergamon Press offices.

Published Monthly except in June and December. Copyright © 1993 Pergamon Press Ltd

Second class postage paid at RAHWAY, NJ. Postmaster send address corrections to *Computers & Geosciences*, c/o Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, USA.

List of Contents

NUMBER 1

Memorial	iii	
Shiliang He and John W. Morse	1	Prediction of halite, gypsum, and anhydrite solubility in natural brines under subsurface conditions
J. R. Wood	23	Calculation of fluid–mineral equilibria using the SIMPLEX algorithm
A. D. Fowler and D. E. Roach	41	Dimensionality analysis of time-series data: nonlinear methods
Forrest M. Hoffman and Vijay S. Tripathi	53	A Geochemical Expert System prototype using object-oriented knowledge representation and a production rule system
S. Jagannadha Rao, P. Rama Rao, and I. V. Radhakrishna Murthy	61	Automatic inversion of self-potential anomalies of sheet-like bodies
M. S. Giammarinaro and S. Micciancio	75	An algorithm for the parametrization of real macroseismic fields
Alex Woronow	81	Generating random numbers on a simplex
Short Notes		
C. G. Burgess and J. L. Landrum	89	Spatial data exchange standards: springboard to the future or fetter to the past?
D. Brooks McKinney	95	Computerized point-counting with the Swift mechanical point-counting stage and an easy-to-build serial interface

NUMBER 2

SPECIAL ISSUE

ANALYSIS AND INTERPRETATION OF DIGITAL SEISMOGRAMS

Introduction	v	
Th. Burghardt and I. Savin	111	Influence of the bandpass filtering and model order on the autoregressive seismic detection in the real-time domain
D. Kracke	117	A three-component event detector based on waveform analysis
R. G. Roberts, A. Lindfors, A. Christoffersson, R. Bödvarsson, and S. Th. Rögnvaldsson	123	Three-component data as an aid to seismic event detection and association: a case study using data from the SIL (Iceland) network
Klaus Stammler	135	SeismicHandler—programmable multichannel data handler for interactive and automatic processing of seismological analyses
M. Musil	141	Interactive and semiautomatic data-analysis procedures
C. Chiaruttini and G. Salemi	149	Artificial Intelligence techniques in the analysis of digital seismograms

Hans-Peter Harjes, Michael L. Jost, Johannes Schweitzer, and Nicolai Gestermann	157	Automatic seismogram analysis at GERESS
Laura Beranzoli, Domenico Giardini, and Nicola A. Pino	167	Seismogram processing at MEDNET
D. Seidl and A. Plešinger	175	ISOP-oriented analysis of broad-band seismograms
Jan Zedník, Jaromír Janský, and Vlastislav Červený	183	Synthetic seismograms in radially inhomogeneous media for ISOP applications
A. Plešinger	189	Fast inversion of transient calibration responses of arbitrary digital seismograph systems
Manfred Joswig	203	Automated seismogram analysis for the tripartite bug array: an introduction
Manfred Joswig	207	Single-trace detection and array-wide coincidence association of local earthquakes and explosions
Eric Klumpen and Manfred Joswig	223	Automated reevaluation of local earthquake data by application of generic polarization patterns for P- and S-onsets
Hartwig Schulte-Theis and Manfred Joswig	233	Clustering and location of mining induced seismicity in the Ruhr basin by automated master event comparison based on Dynamic Waveform Matching (DWM)
Leif Persson	243	Bispectrum analysis of the coda records from local earthquakes and mine explosions
Victoria Oancea and Olivia Bazacliu	249	Analysis of coda waves from Romanian earthquakes
Dieter Stoll	253	New storage and presentation methods for rapid access to large sets of triggered records
R. W. E. Green	259	Data compression of broad-band seismic data using a portable PC
Parashu R. Uniyal and A. Manglik	263	Stop PC-AIDS from spreading through your PC—an early warning system
Tetsuo Takanami and Genshiro Kitagawa	295	Multivariate time-series model to estimate the arrival times of S-waves

NUMBER 3

Andrzej Maćkiewicz and Waldemar Ratajczak	303	Principal Components Analysis (PCA)
Mark Hinman	343	A Lotus 1-2-3 diamond drillhole structural manipulation spreadsheet: drillcore structural data generation
Guocheng Pan and Lixian Xia	355	Optimal reduction of multiple data structures by the Pijk-type model
Kacheong Yeung and Chayan Chakrabarty	391	An algorithm for transient pressure analysis in arbitrarily shaped reservoirs

J. P. M. Syvitski and J. M. Alcott 399 GRAIN2: predictions of particle size seaward of river mouths

Albert J. Rudman, Subhashis Mallick, L. Neil Frazer, and Peter Bromirski 447 Workstation computation of synthetic seismograms for vertical and horizontal profiles: a full wavefield response for a two-dimensional layered half-space

Short Notes

S. Hurley and R. J. Wiltshire 475 Computing thermal diffusivity from soil temperature measurements

Abani Kanta Samantaray and John Starkey 479 A fast algorithm for pixel gray-level ranking in adaptive rank filters applied to digital images

NUMBER 4

Massimo D'Orazio 483 A Macintosh BASIC program for the interactive testing of combined assimilation and fractional crystallization

Gregory A. Plumb 493 Compression of continuous spatial data in the raster digital format

Daniel G. Brown, Ling Bian, and Stephen J. Walsh 499 Response of a distributed watershed erosion model to variations in input data aggregation levels

Altan Turgut 511 TOPOVEL: a FORTRAN program for tomographic inversion of porosity and velocity structure in the subsurface

Y. Xu 533 ARLOSS: a FORTRAN program for modeling the effects of initial ^{40}Ar losses on $^{40}Ar/^{39}Ar$ dating

Laura Carbognin and Giancarlo Taroni 547 A new method to investigate the equality of bivariate dependence. Application to sediment samples study

Xiping Wu and Yingxin Zhou 567 Reserve estimation using neural network techniques

Steven E. Franklin and Clayton F. Blodgett 577 An example of satellite multisensor data fusion

N. Petford, J. A. Miller, and J. Briggs 585 The automated counting of fission tracks in an external detector by image analysis

Short Notes

W. E. Sharp and Carter Bays 593 A portable random number generator for single-precision floating-point arithmetic

Gilles Grandjean and Dorothée Guillon 601 MIGRAY: a C program for ray-tracing migration

Reviews 613

Announcement

Bryn Jones 617 Org-Geochem: an electronic information exchange for organic geochemistry and related fields of study

NUMBER 5

Kevin D. Crowley 619 LENMODEL: a forward model for calculating length distributions and fission-track ages in apatite

B. S. Rowlingson and P. J. Diggle 627 Splancs: spatial point pattern analysis code in S-Plus

M. M. Malleswara Rao, S. Lakshminarayana, K. S. R. Murthy, and A. S. Subrahmanyam — 657 Two computer programs for the analysis of marine magnetic data

Patrice de Caritat — 673 HEAT: a FORTRAN computer program for calculating 1-D conductive and advective heat transport in geological formations

B. P. A. Vander Velpen and R. J. Sporry — 691 RESIST. A computer program to process resistivity sounding data on PC compatibles

C. B. Papazachos and G. N. Tsokas — 705 A FORTRAN program for the computation of 2-dimensional inverse filters in magnetic prospecting

John Haraden — 717 C programs for controlling pore and bulk volume compressibility experiments

K. Pandarinath and A. C. Narayana — 735 Computer program for the determination of grain-size statistics and sediment transport direction

NUMBER 6

S. Jaggi, Dale A. Quattrochi, and Nina Siu-Ngan Lam — 745 Implementation and operation of three fractal measurement algorithms for analysis of remote-sensing data

David R. Lapen and Lawrence W. Martz — 769 The measurement of two simple topographic indices of wind sheltering-exposure from raster digital elevation models

D. Bhaskara Rao and N. Ramesh Babu — 781 A FORTRAN-77 computer program for three-dimensional inversion of magnetic anomalies resulting from multiple prismatic bodies

L. A. Buryakovsky — 803 Method and software for numerical simulation of reservoir properties of oil- and gas-bearing rocks

Xiaomao Zhang — 817 SULF34: a QUICKBASIC program for calculating sulfur isotope distribution in log fO_2–pH diagram

S. Pfleiderer, D. G. A. Ball, and R. C. Bailey — 825 AUTO: a computer program for the determination of the two-dimensional autocorrelation function of digital images

Christopher M. Prince — 831 RADON and DIRPOWER: projection software for 2-D Fourier power spectra

D. E. Roach and A. D. Fowler — 849 Dimensionality analysis of patterns: fractal measurements

Corrigendum — 871

NUMBER 7

Stefano Micciancio — 873 A combinatorial algorithm for the optimization of refraction seismics data inversion

Peter Frykman and Thomas Alexander Rogon — 887 Anisotropy in pore networks analyzed with 2-D autocorrelation (variomaps)

E. Savazzi — 931 C++ classes for theoretical shell morphology

Frederick Delay and Pierre Bracq	965	A vectorial method for the study of the spatial distribution or morphological features applied to the needs of hydrogeology
V. D'Agostino, M. Stanghellini, and G. Trisorio-Liuzzi	981	A FORTRAN-77 program for preliminary extraction of drainage networks based on a DEM
Daquan Tian, Soroosh Sorooshian, and Donald E. Myers	1007	Correspondence analysis with Matlab
Scott E. Johnson and Ross R. Moore	1023	Surface reconstruction from parallel serial sections using the program *mathematica*: example and source code
L. M. Barron	1033	CHI_PET: computerized hierarchical indexing of petrological information
Kim Mills, Ferenc Csillag, and Maher Kaddoura	1051	GORDIUS: a data parallel algorithm for spatial data conversion

NUMBER 8

K. S. Börjesson and A. T. Emrén	1065	SOLISOL—a program using PHREEQE to solve solid solution/aqueous equilibria
A. D. Gouveia	1071	An aid to two-dimensional contouring using non-uniform orthogonal grids—a FORTRAN algorithm
Guocheng Pan	1077	Canonical favorability model for data integration and mineral potential mapping
Guojiang Liu	1101	An algorithm and sensitivity studies of one-dimensional tectonic modeling using a finite-element method
J. Springer	1115	Decompaction and backstripping with regard to erosion, salt movement, and interlayered bedding
D. Barca, G. M. Crisci, and G. A. Ranieri	1127	Developments of the Rayleigh equation: "Crystal" a Pascal program for simulating fractional crystallization
Alexei A. Ariskin, Mikhail Ya. Frenkel, Galina S. Barmina, and Roger L. Nielsen	1155	COMAGMAT: a FORTRAN program to model magma differentiation processes
Coskun Unan	1171	The update of KAYDER information system for igneous rock data in Turkey
Ulf Nordlund and Cedric M. Griffiths	1185	Automatic construction of two- and three-dimensional chronostratigraphic sections from digitized seismic data
Reviews	1207	

NUMBER 9

I. V. Radhakrishna Murthy and P. Rama Rao	1213	Inversion of gravity and magnetic anomalies of two-dimensional polygonal cross sections
Jean-Luc Potdevin	1229	Gresens 92: a simple Macintosh program of the Gresens method

G. Gottardi and M. Venutelli	1239	RICHARDS: computer program for the numerical simulation of one-dimensional infiltration into unsaturated soil
Dong Wang and Larry Mayer	1267	WBANDZ: a C program to calibrate the hydrologic model and calculate monthly water balance and Palmer's *Z*-index
Fabio Cavallini	1285	Computing the unit hydrograph via linear programming
Rune B. Larsen	1295	"GEOFLUID": a FORTRAN 77 program to compute chemical properties of gas species in C–O–H fluids
Juan Homero Hinojosa and Kevin L. Mickus	1321	FORELAND BASIN—a FORTRAN program to model the formation of foreland basins resulting from the flexural deflection of the lithosphere caused by a time-varying distributed load
David J. Andersen, Donald H. Lindsley, and Paula M. Davidson	1333	QUILF: a Pascal program to assess equilibria among Fe–Mg–Mn–Ti oxides, pyroxenes, olivine, and quartz
Ross M. Renner	1351	A constrained least-squares subroutine for adjusting negative estimated element concentrations to zero
Blanka Sperner, Lothar Ratschbacher, and Rolf Ott	1361	Fault–striae analysis: a Turbo Pascal program package for graphical presentation and reduced stress tensor calculation
Review	1389	

NUMBER 10

Lee De Cola and Nalan Montagne	1393	The PYRAMID system for multiscale raster analysis
Lutz Gromoll	1405	GRAINUM—a program for the genetic interpretation of the grain-size distribution of sands
Thomas M. McCaffrey and Steven E. Franklin	1413	Automated training site selection for large-area remote-sensing image analysis
D. Wright, C. L. Liu, D. Stanley, H. C. Chen, and J. H. Fang	1429	XRAYS: a fuzzy expert system for qualitative XRD analysis
Ali El-Naqa and Nasser Abu Zeid	1445	A BASIC program for calculating subsurface water temperatures using chemical geothermometers—implication to geothermal reservoir estimation
Victor J. D. Tsai	1463	Fast topological construction of Delaunay triangulations and Voronoi diagrams
James B. Campbell and Limei Ran	1475	CHROM: a C program to evaluate the application of the dark object subtraction technique to digital remote-sensing data
J. Broome, B. Brodaric, D. Viljoen, and D. Baril	1501	The NATMAP digital geoscience data-management system
R. A. Olea, V. Pawlowsky, and J. C. Davis	1517	Volumetric calculations in an oil field: the basis method
Geoffrey C. Bohling and John C. Davis	1529	A FORTRAN program for Monte Carlo simulation of oil-field discovery sequences

COGS Contribution
B. S. Penn, A. J. Gordon, and R. F. Wendlandt — 1545 — Using neural networks to locate edges and linear features in satellite images

Short Note
John K. Hall — 1567 — DEMPACK: DEM data storage in a two-byte integer

Reviews — 1571

Comment — 1579

Author's reply — 1581

Call for Papers — I — Special issue of *Computers & Geosciences* "Environmental Computing"
